

## **Now Offering Laser Therapy**

We're excited to announce that we now offer laser therapy as part of our services!

Laser therapy is a non-invasive, pain-free treatment that uses light to stimulate healing in muscles, joints, and soft tissues. It can help reduce inflammation, relieve pain, and speed up recovery — making it a great addition to your dog's rehabilitation or wellness plan.

### **Frequently Asked Questions**

#### **What conditions can laser therapy help with?**

Laser therapy can be beneficial for a wide range of conditions, including arthritis, muscle strains, ligament injuries, hip or elbow dysplasia, post-surgical healing, and general inflammation or pain.

#### **Is laser therapy safe?**

Yes, it's completely safe when administered by trained professionals. It's non-invasive, pain-free, and well-tolerated by most dogs.

#### **Will my dog feel anything during the session?**

Most dogs find laser therapy relaxing. They may feel a gentle warmth in the treatment area, but the process is entirely comfortable.

#### **How many sessions will my dog need?**

That depends on your dog's condition. Some dogs respond well after just a few sessions, while others may benefit from a longer treatment plan. We're happy to advise you based on your dog's specific needs.

#### **Can I combine laser with hydrotherapy?**

Absolutely! Laser therapy works very well alongside hydrotherapy, either before or after a swim session, to help enhance recovery and mobility.

## Introductory Offer

Take advantage of our special launch pricing:

- Single session (30 minutes, 1–3 areas): **£35**
- Package of 5 sessions: **£160**

Sessions are tailored to your dog's individual needs and can be used alongside hydrotherapy or as a standalone treatment.

If you're unsure whether laser therapy is suitable for your dog, feel free to get in touch — we're happy to help.
